Claims 1 (2-7 dependent thereon) and 8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

There is no means recited in claims 1 or 8 to provide enablement for the shelf to pivot.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pinkstone et al. 5,678,492 in view of either Stuart 6,230,907 or Draudt 6,578,498. Pinkstone et al. teach the device claimed absent the "at least one partition". Stuart teaches a shelf having a partition at 176 (Fig. 14). Draudt et al. teach a shelf partition at 44 (Fig. 1). To provide the Pinkstone et al. shelf with a partition as taught by either Draudt et al. or Stuart, for the purpose of dividing items stored thereon, would have been obvious for one having ordinary skill in the art at the time of the invention.
